Valkyrie Enterprises Acquires Quality Performance, Inc.

Virginia Beach, VA – Valkyrie Enterprises, LLC, a leading maritime and defense engineering and technical services firm, is pleased to announce its acquisition of Quality Performance, Inc. (QPI), headquartered in Fredericksburg, VA.

QPI is a hardware/software integrator that provides navigational and meteorological systems to the U.S. Navy, foreign navies, and commercial entities. The QPI product line includes the Moriah Wind System and other meteorological and navigational system elements, as well as multi-functional, marinized displays, remote alarm panels, and low-profile speed log probes. The Moriah Wind System is installed on all U.S. Navy air capable ships.

“The addition of QPI to the Valkyrie team is a leap forward in our Hardware/Software Integration line of business and allows us to wrap our engineering, logistics, and installation services around the QPI product line. Overall, this synergy makes this a 2+2=5 deal”, said Valkyrie’s President and CEO, Gary Lisota. Gary added, “August 4, the day we closed on this deal, was also our 10-year anniversary, making this acquisition extra special and certainly memorable.”

ABOUT VALKYRIE
